DETAILED ACTION

This action is in response to Applicant's filing of 12/4/2008. Claims 1-4 and 6-7 are pending and examined below.

Response to Arguments

1. Applicant's arguments, filed 12/4/2008, with respect to the rejections based on 35 USC 101 and 35 USC 112, second paragraph have been fully considered and are persuasive. These rejections have been withdrawn. The Examiner notes, with respect to 35 USC 101, that the Specification, at page 7, recites "The required quantity determination means 12 includes a CPU". When treated under 25 USC 112, sixth paragraph, this statement in the Specification necessarily limits Applicant's claimed system to one in which at least the required determination means includes a CPU, thus differentiating Applicant's claim from software, *per se*, and overcoming the rejection. With respect to 35 USC 112, second, the Specification does enable one of ordinary skill in the art to grasp that the variously recited means are directed to various software elements that cause a processor to complete the various steps.

Allowable Subject Matter

2. Claims 1-4 and 6-7 are pending and allowed. The following is an examiner's statement of reasons for allowance:

Independent claim 1 recites a system with a novel correction means and second ordering means. The closest patent art of record is Tamaki, which teaches a production planning system with superfluous parts elimination features

which works to adjust the inventory levels of parts based on changes to the production plan by the operator, but fails to teach the particular correction and second ordering means of Applicant's claimed invention.

The closest non-Patent literature of record is Avraham Shtub's Book Enterprise Resource Planning, The Dynamics of Operations Management, Kulwer Academic Publishers, 1999, pp 100-112, providing an overview of ERP systems and the time periods involved, but failing to teach particulars related to the claimed correction means and second ordering means.

As such, the art of record fails to teach, suggest or render

Applicant's claimed invention obvious, either individually or in combination.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inquiry

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRIAN FERTIG whose telephone number is (571)270-5131. The examiner can normally be reached on Monday - Friday 8:30am to 5:00pm EST. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on (571) 272-6712. The fax phone

number for the organization where this application or proceeding is assigned is 571-273-8300.

5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
